Roles & Permissions

Roles & Permission

In this section you can create Roles and assigned the permissions, also you can view, delete & edit the permissions.
The assigned permission is effected on employee only, when you create new the new roles and assigned the permissions it will only shows to those employees which have these ASSIGNED ROLES.

To assigned the permissions against the Roles, You have to click on view permissions and assigned the desired permissions. so the employee can access them from employee dashboard.
